GAIT POSTURE

www.elsevier.com/locate/gaitpost

Subject index

Volume 26 (2007)

Accelerometer; Falls in the elderly; Fall detection; ADL; Resultant-magnitude signal **26**, 194

Accelerometer; Stride length; Levodopa; Parkinsonian; Locomotion **26**, 200

ADL; Falls in the elderly; Fall detection; Accelerometer; Resultant-magnitude signal **26**, 194

Age; Balance control; Body weight; Center of pressure; Posturography **26**, 32

Age; Gait; Slips; Falls; Electromyography **26**, 142

Ageing; Balance; Muscle; Posture; Tendon; Vision **26**, 343

Ageing; Plantar pressure; Gait **26**, 68

Ageing; Staircase; Gait; Elderly; Mobility **26**, 463

Aging; Falls; Dopamine; Balance; Sensory integration **26**, 516

Aging; Gait; Gait instability; Locomotion; Dual task **26**, 113

Alzheimer disease; Gait disorder; Walking; Lewy body disease **26**, 414

Ambulatory measurement; Ground reaction force; Gait analysis; Biomechanics **26**, 39

Amputees; Gait; Equilibrium; Rehabilitation; Obstacle avoidance **26**, 587

Amputees; Leg prosthesis; Gait; Postural balance **26**, 489

Amputees; Post-effect; Vibration; Postural reference; Proprioception **26**, 595

Anatomical calibration; Anatomical landmarks; Biomechanics; Human movement analysis; Stereophotogrammetry **26**, 179

Anatomical landmarks; Anatomical calibration; Biomechanics; Human movement analysis; Stereophotogrammetry **26**, 179

Anatomical reference frames; Human movement analysis; Experimental methodology; Marker-set; Kinematic model; Variability; Offset angles **26**, 560

Ankle; Flexion reflex; Unloading reaction; Electrical stimulation **26**, 106

Ankle strategy; Posture; Coordinative modes; Hip strategy **26**, 263

Anterior cruciate ligament; Athletic injuries; Biomechanics; Perception **26**, 378

Anticipatory postural adjustments; Single step forward; Center of mass; Step time; Performance **26**, 526

Arch type; Footwear; Midsole; Fatigue **26**, 219

Arm swing; Gait; Auditory rhythms **26**, 150

Arm swing; Gait; Coordination **26**, 135

Asymmetry; Cerebral palsy; Gait analysis; Femoral derotation osteotomy; Overcorrection; Undercorrection **26**, 25

Athletic injuries; Anterior cruciate ligament; Biomechanics; Perception **26**, 378

Auditory rhythms; Gait; Arm swing **26**, 150

Balance; Ageing; Muscle; Posture; Tendon; Vision **26**, 343

Balance assessment; Center of Pressure; Proprioception; Highly trained **26**, 501

Balance; Cognition; Postural sway; Dual tasks; Brooks' spatial and nonsense tasks **26**, 470

Balance control; Body weight; Age; Center of pressure; Posturography **26**, 32

Balance; Falls; Dopamine; Aging; Sensory integration **26**, 516

Balance; Gait initiation; Postural stability; Progressive supranuclear palsy **26**, 393

Balance; Gait; Irregular surface; Step variability; Falls **26**, 156

Balance; Methodology; Gait **26**, 226

Balance; Posture; Movement; Coordination; Synergy **26**, 256

Balance; Weight transfer; Forces; Elderly; Postural **26**, 508

Biomechanics; Anatomical calibration; Anatomical landmarks; Human movement analysis; Stereophotogrammetry **26**, 179

Biomechanics; Athletic injuries; Anterior cruciate ligament; Perception **26**, 378

Biomechanics; Gait analysis; Knee prosthesis **26**, 48

Biomechanics; Ground reaction force; Ambulatory measurement; Gait analysis **26**, 39

Biomechanics; Kinematics; Gait transition; Walking; Running **26**, 349

BMD; Torsion; Gait; Tibia; Bone; Osteoarthritis **26**, 446

Body weight; Balance control; Age; Center of pressure; Posturography **26**, 32

Bone; Torsion; Gait; BMD; Tibia; Osteoarthritis **26**, 446

Brooks' spatial and nonsense tasks; Balance; Cognition; Postural sway; Dual tasks **26**, 470

Calibration; Gait laboratory equipment; Quality assurance **26**, 317

Center of mass; Anticipatory postural adjustments; Single step forward; Step time; Performance **26**, 526

Center of mass; Gait parameters; Determinants of gait; Vertical displacement; Cerebral palsy **26**, 295

Center of Pressure; Balance assessment; Proprioception; Highly trained **26**, 501

Center of pressure; Balance control; Body weight; Age; Posturography **26**, 32

Centre of mass; Treadmill; Oxygen cost; Froude; Phase shift **26**, 400

Cerebral palsy; Crouch gait; Hamstrings; Psoas; Spasticity **26**, 532

Cerebral palsy; Crouch gait; Tibial torsion; Dynamics; Induced acceleration **26**, 546

Cerebral palsy; Electromyography; Gait; Surgery; Child **26**, 362

Cerebral palsy; Electromyography; Motion analysis; Wavelet analysis **26**, 420

Cerebral palsy; Gait analysis; Femoral derotation osteotomy; Overcorrection; Undercorrection; Asymmetry **26**, 25

Cerebral palsy; Gait initiation; Children **26**, 301

Cerebral palsy; Gait; Muscle strength; Exercise; Surgery **26**, 475

Cerebral palsy; Gait parameters; Determinants of gait; Center of mass; Vertical displacement **26**, 295

Cerebral palsy; Rectus transfer; Gait; Jackknifing; Statistics **26**, 76

Cerebral palsy; Repeatability; Spasticity; Three-dimensional measurement; Pendulum **26**, 97

Cervical spine; Motion analysis; Segmental movement; Videofluoroscopy **26**, 161

Charcot-Marie-Tooth disease; Hereditary sensory motor neuropathy; Clinical gait analysis **26**, 120

Child; Electromyography; Cerebral palsy; Gait; Surgery **26**, 362

Children; Gait; Dual task **26**, 231

Children; Gait initiation; Cerebral palsy **26**, 301

Children; Gait; Plantar pressure distribution; Foot development; Normative values **26**, 238

Children; Postural sway; Lighting; Visual environment; Postural stability **26**, 442

Clinical gait analysis; Charcot-Marie-Tooth disease; Hereditary sensory motor neuropathy **26**, 120

Clinical tests; Sit-to-walk; Falls in the elderly **26**, 11

Cognition; Balance; Postural sway; Dual tasks; Brooks' spatial and nonsense tasks **26**, 470

Collision avoidance; Time to contact; Human locomotion; Kinematics; Vision **26**, 186

Compartment; Toe-out; Medial; Gait; Mechanics **26**, 436

Coordination; Gait; Arm swing **26**, 135

Coordination; Posture; Movement; Balance; Synergy **26**, 256

Coordinative modes; Posture; Ankle strategy; Hip strategy **26**, 263

Cost; Gait; Oxygen; Reliability **26**, 494

Crouch gait; Hamstrings; Psoas; Spasticity; Cerebral palsy **26**, 532

Crouch gait; Tibial torsion; Cerebral palsy; Dynamics; Induced acceleration **26**, 546

Determinants of gait; Gait parameters; Center of mass; Vertical displacement; Cerebral palsy **26**, 295

DFA; Walking; Variability; Stability **26**, 128

Dopamine; Falls; Aging; Balance; Sensory integration **26**, 516

Dual task; Gait; Children **26**, 231

Dual task; Gait; Gait instability; Locomotion; Aging **26**, 113

Dual tasks; Balance; Cognition; Postural sway; Brooks' spatial and nonsense tasks **26**, 470

Dual-task; Gait variability; Impaired executive function **26**, 572

Dynamics; Crouch gait; Tibial torsion; Cerebral palsy; Induced acceleration **26**, 546

Elderly; Gait; Surface height change; Stepping responses **26**, 82

Elderly; Gaze; Eye movements; Human locomotion; Falls **26**, 59

Elderly; Staircase; Gait; Ageing; Mobility **26**, 463

Elderly; Weight transfer; Forces; Balance; Postural **26**, 508

Electrical stimulation; Flexion reflex; Ankle; Unloading reaction **26**, 106

Electromyography; Cerebral palsy; Gait; Surgery; Child **26**, 362

Electromyography; Energy cost of running; Locomotion; Muscle; Oxygen consumption **26**, 607

Electromyography; Gait; Age; Slips; Falls **26**, 142

Electromyography; Motion analysis; Cerebral palsy; Wavelet analysis **26**, 420

Elite athletes; Gait; Obstacle avoidance; Locomotor control; Navigation **26**, 539

EMG; Hemiplegic cerebral palsy; Equinus; Gait analysis; Unilateral toe-walking **26**, 577

Energy cost of running; Electromyography; Locomotion; Muscle; Oxygen consumption **26**, 607

Energy expenditure; Stroke; Robotic rehabilitation; Gait; Treadmill training **26**, 372

Equilibrium; Gait; Amputees; Rehabilitation; Obstacle avoidance **26**, 587

Equinus; EMG; Hemiplegic cerebral palsy; Gait analysis; Unilateral toe-walking **26**, 577

Exercise; Cerebral palsy; Gait; Muscle strength; Surgery **26**, 475

Experimental methodology; Human movement analysis; Anatomical reference frames; Marker-set; Kinematic model; Variability; Offset angles **26**, 560

Eye movements; Gaze; Human locomotion; Falls; Elderly **26**, 59

Fall detection; Falls in the elderly; Accelerometer; ADL; Resultant-magnitude signal **26**, 194

Falls; Dopamine; Aging; Balance; Sensory integration **26**, 516

Falls; Gait; Age; Slips; Electromyography **26**, 142

Falls; Gait; Irregular surface; Step variability; Balance **26**, 156

Falls; Gaze; Eye movements; Human locomotion; Elderly **26**, 59

Falls in the elderly; Fall detection; Accelerometer; ADL; Resultant-magnitude signal **26**, 194

Falls in the elderly; Sit-to-walk; Clinical tests **26**, 11

Falls; Older adults; Intervention **26**, 208

Fatigue; Footwear; Midsole; Arch type **26**, 219

Fatigue; Iliotibial band syndrome; Running; Strain; Tension; Transverse kinematics **26**, 407

Fatigue; Postural stability; Lower extremity **26**, 214

Femoral derotation osteotomy; Cerebral palsy; Gait analysis; Overcorrection; Undercorrection; Asymmetry **26**, 25

Fitness training; Whole body vibration; Postural control; Older individuals **26**, 309

Flexion reflex; Ankle; Unloading reaction; Electrical stimulation **26**, 106

Foot development; Gait; Children; Plantar pressure distribution; Normative values **26**, 238

Footswitch; Gait; Ground reaction force; Repeatability; Gait events **26**, 323

Footwear; Midsole; Arch type; Fatigue **26**, 219

Forces; Weight transfer; Elderly; Balance; Postural **26**, 508

Froude; Centre of mass; Treadmill; Oxygen cost; Phase shift **26**, 400

Functional electrical stimulation; Normal gait; Gastrocnemius; Soleus **26**, 482

Gait; Age; Slips; Falls; Electromyography **26**, 142

Gait; Ageing; Plantar pressure **26**, 68

Gait; Amputees; Leg prosthesis; Postural balance **26**, 489

Gait analysis; Cerebral palsy; Femoral derotation osteotomy; Overcorrection; Undercorrection; Asymmetry **26**, 25

Gait analysis; EMG; Hemiplegic cerebral palsy; Equinus; Unilateral toe-walking **26**, 577

Gait analysis; Ground reaction force; Ambulatory measurement; Biomechanics **26**, 39

Gait analysis; Idiopathic toe walking; ITW; Severity classification **26**, 428

Gait analysis; Kinematics; Kinetics; History **26**, 331

Gait analysis; Knee orthosis; Valgus brace; Osteoarthritis; Peak varus moment **26**, 3

Gait analysis; Knee prosthesis; Biomechanics **26**, 48

Gait analysis; Physical therapy; Parkinson's disease **26**, 452

Gait; Arm swing; Auditory rhythms **26**, 150

Gait; Arm swing; Coordination **26**, 135

Gait; Cerebral palsy; Muscle strength; Exercise; Surgery **26**, 475

Gait; Children; Plantar pressure distribution; Foot development; Normative values **26**, 238

Gait disorder; Walking; Lewy body disease; Alzheimer disease **26**, 414

Gait; Dual task; Children **26**, 231

Gait; Elderly; Surface height change; Stepping responses **26**, 82

Gait; Electromyography; Cerebral palsy; Surgery; Child **26**, 362

Gait; Equilibrium; Amputees; Rehabilitation; Obstacle avoidance **26**, 587

Gait events; Gait; Footswitch; Ground reaction force; Repeatability **26**, 323

Gait; Footswitch; Ground reaction force; Repeatability; Gait events **26**, 323

Gait; Gait instability; Locomotion; Dual task; Aging **26**, 113

Gait; Hamstrings; Hamstring length; Simulation **26**, 90

Gait initiation; Cerebral palsy; Children **26**, 301

Gait initiation; Postural stability; Balance; Progressive supranuclear palsy **26**, 393

Gait instability; Gait; Locomotion; Dual task; Aging **26**, 113

Gait; Irregular surface; Step variability; Falls; Balance **26**, 156

Gait; Kinematics; Kinetics; Treadmill; Overground **26**, 17

Gait; Knee osteoarthritis; Obstacle crossing; Lower limb; Joint kinematics; Joint kinetics **26**, 553

Gait laboratory equipment; Calibration; Quality assurance **26**, 317

Gait; Load carriage; Ground reaction force; Military; Rifle carriage **26**, 611

Gait; Methodology; Balance **26**, 226

Gait; Obstacle avoidance; Locomotor control; Navigation; Elite athletes **26**, 539

Gait; Oxygen; Cost; Reliability **26**, 494

Gait parameters; Determinants of gait; Center of mass; Vertical displacement; Cerebral palsy **26**, 295

Gait; Parkinson's disease; Turning **26**, 172

Gait; Rectus transfer; Cerebral palsy; Jackknifing; Statistics **26**, 76

Gait stability; Lower-limb kinematic variability **26**, 327

Gait stability; Virtual reality; Locomotion; Treadmill; Ground reaction force **26**, 289

Gait; Staircase; Elderly; Ageing; Mobility **26**, 463

Gait; Stroke; Robotic rehabilitation; Energy expenditure; Treadmill training **26**, 372

Gait; Tai Chi; Obstacle; Movement **26**, 248

Gait; Toe-out; Medial; Compartment; Mechanics **26**, 436

Gait; Torsion; BMD; Tibia; Bone; Osteoarthritis **26**, 446

Gait transition; Kinematics; Walking; Running; Biomechanics **26**, 349

Gait variability; Impaired executive function; Dual-task **26**, 572

Gastrocnemius; Normal gait; Soleus; Functional electrical stimulation **26**, 482

Gaze; Eye movements; Human locomotion; Falls; Elderly **26**, 59

Ground reaction force; Ambulatory measurement; Gait analysis; Biomechanics **26**, 39

Ground reaction force; Gait; Footswitch; Repeatability; Gait events **26**, 323

Ground reaction force; Load carriage; Military; Gait; Rifle carriage **26**, 611

Ground reaction force; Virtual reality; Locomotion; Gait stability; Treadmill **26**, 289

Hamstring length; Gait; Hamstrings; Simulation **26**, 90

Hamstrings; Crouch gait; Psoas; Spasticity; Cerebral palsy **26**, 532

Hamstrings; Gait; Hamstring length; Simulation **26**, 90

Harmonic analysis reliability; Upper body kinematics; Head and trunk coordination; Human gait **26**, 386

Head and trunk coordination; Upper body kinematics; Harmonic analysis reliability; Human gait **26**, 386

Hemiplegic cerebral palsy; EMG; Equinus; Gait analysis; Unilateral toe-walking **26**, 577

Hereditary sensory motor neuropathy; Charcot-Marie-Tooth disease; Clinical gait analysis **26**, 120

Highly trained; Balance assessment; Center of Pressure; Proprioception **26**, 501

Hip strategy; Posture; Coordinative modes; Ankle strategy **26**, 263

History; Gait analysis; Kinematics; Kinetics **26**, 331

Human gait; Upper body kinematics; Harmonic analysis reliability; Head and trunk coordination **26**, 386

Human locomotion; Gaze; Eye movements; Falls; Elderly **26**, 59

Human locomotion; Time to contact; Collision avoidance; Kinematics; Vision **26**, 186

Human movement analysis; Anatomical calibration; Anatomical landmarks; Biomechanics; Stereophotogrammetry **26**, 179

Human movement analysis; Anatomical reference frames; Experimental methodology; Marker-set; Kinematic model; Variability; Offset angles **26**, 560

Idiopathic toe walking; Gait analysis; ITW; Severity classification **26**, 428

Iliotibial band syndrome; Running; Strain; Tension; Transverse kinematics; Fatigue **26**, 407

Impaired executive function; Gait variability; Dual-task **26**, 572

Induced acceleration; Crouch gait; Tibial torsion; Cerebral palsy; Dynamics **26**, 546

Intervention; Falls; Older adults **26**, 208

Irregular surface; Gait; Step variability; Falls; Balance **26**, 156

ITW; Idiopathic toe walking; Gait analysis; Severity classification **26**, 428

Jackknifing; Rectus transfer; Cerebral palsy; Gait; Statistics **26**, 76

Joint kinematics; Knee osteoarthritis; Gait; Obstacle crossing; Lower limb; Joint kinetics **26**, 553

Joint kinetics; Knee osteoarthritis; Gait; Obstacle crossing; Lower limb; Joint kinematics **26**, 553

Kinematic model; Human movement analysis; Anatomical reference frames; Experimental methodology; Marker-set; Variability; Offset angles **26**, 560

Kinematics; Gait analysis; Kinetics; History **26**, 331

Kinematics; Gait; Kinetics; Treadmill; Overground **26**, 17

Kinematics; Gait transition; Walking; Running; Biomechanics **26**, 349

Kinematics; Time to contact; Collision avoidance; Human locomotion; Vision **26**, 186

Kinetics; Gait analysis; Kinematics; History **26**, 331

Kinetics; Gait; Kinematics; Treadmill; Overground **26**, 17

Knee orthosis; Gait analysis; Valgus brace; Osteoarthritis; Peak varus moment **26**, 3

Knee osteoarthritis; Gait; Obstacle crossing; Lower limb; Joint kinematics; Joint kinetics **26**, 553

Knee prosthesis; Gait analysis; Biomechanics **26**, 48

Lateropulsion; Stroke; Measurement **26**, 603

Leg prosthesis; Amputees; Gait; Postural balance **26**, 489

Levodopa; Stride length; Parkinsonian; Locomotion; Accelerometer **26**, 200

Lewy body disease; Gait disorder; Walking; Alzheimer disease **26**, 414

Lighting; Postural sway; Visual environment; Postural stability; Children **26**, 442

Load carriage; Ground reaction force; Military; Gait; Rifle carriage **26**, 611

Load sharing; Static optimization; Simulation of gait; Movement analysis **26**, 279

Locomotion; Electromyography; Energy cost of running; Muscle; Oxygen consumption **26**, 607

Locomotion; Gait; Gait instability; Dual task; Aging **26**, 113

Locomotion; Stride length; Levodopa; Parkinsonian; Accelerometer **26**, 200

Locomotion; Virtual reality; Gait stability; Treadmill; Ground reaction force **26**, 289

Locomotor control; Gait; Obstacle avoidance; Navigation; Elite athletes **26**, 539

Lower extremity; Fatigue; Postural stability **26**, 214

Lower limb; Knee osteoarthritis; Gait; Obstacle crossing; Joint kinematics; Joint kinetics **26**, 553

Lower-limb kinematic variability; Gait stability **26**, 327

Marker-set; Human movement analysis; Anatomical reference frames; Experimental methodology; Kinematic model; Variability; Offset angles **26**, 560

Measurement; Stroke; Lateropulsion **26**, 603

Mechanics; Toe-out; Medial; Compartment; Gait **26**, 436

Medial; Toe-out; Compartment; Gait; Mechanics **26**, 436

Methodology; Gait; Balance **26**, 226

Treadmill training; Stroke; Robotic rehabilitation; Energy expenditure; Gait **26**, 372

Treadmill; Virtual reality; Locomotion; Gait stability; Ground reaction force **26**, 289

Tripping; Trunk movements; Trunk stiffness; Postural control **26**, 272

Trunk movements; Tripping; Trunk stiffness; Postural control **26**, 272

Trunk stiffness; Tripping; Trunk movements; Postural control **26**, 272

Turning; Parkinson's disease; Gait **26**, 172

Undercorrection; Cerebral palsy; Gait analysis; Femoral derotation osteotomy; Overcorrection; Asymmetry **26**, 25

Unilateral toe-walking; EMG; Hemiplegic cerebral palsy; Equinus; Gait analysis **26**, 577

Unloading reaction; Flexion reflex; Ankle; Electrical stimulation **26**, 106

Upper body kinematics; Harmonic analysis reliability; Head and trunk coordination; Human gait **26**, 386

Valgus brace; Gait analysis; Knee orthosis; Osteoarthritis; Peak varus moment **26**, 3

Variability; Human movement analysis; Anatomical reference frames; Experimental methodology; Marker-set; Kinematic model; Offset angles **26**, 560

Variability; Walking; DFA; Stability **26**, 128

Vertical displacement; Gait parameters; Determinants of gait; Center of mass; Cerebral palsy **26**, 295

Vibration; Post-effect; Amputees; Postural reference; Proprioception **26**, 595

Videofluoroscopy; Motion analysis; Cervical spine; Segmental movement **26**, 161

Virtual reality; Locomotion; Gait stability; Treadmill; Ground reaction force **26**, 289

Vision; Ageing; Balance; Muscle; Posture; Tendon **26**, 343

Vision; Time to contact; Collision avoidance; Human locomotion; Kinematics **26**, 186

Visual environment; Postural sway; Lighting; Postural stability; Children **26**, 442

Walking; Gait disorder; Lewy body disease; Alzheimer disease **26**, 414

Walking; Kinematics; Gait transition; Running; Biomechanics **26**, 349

Walking; Variability; DFA; Stability **26**, 128

Wavelet analysis; Electromyography; Motion analysis; Cerebral palsy **26**, 420

Weight transfer; Forces; Elderly; Balance; Postural **26**, 508

Whole body vibration; Postural control; Fitness training; Older individuals **26**, 309
